Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. The compounds according to formula 1 of claim 1, wherein n is 1. These  
Are classifiable in class 544, subclass 224+.
- II. The compounds according to formula 1 of claim 1, wherein n is 2. These  
are classifiable in class 540, subclass 484.
- III. The compounds according to formula 1 of claim 1, wherein n is 3. These  
are classifiable in class 540, subclass 450.
- IV. The compounds according to formula 1 of claim 1, wherein n is 4. These  
are classifiable in class 540, subclass 476.
- V. The method of making according to claim 11, wherein n is 1.  
The claims are drawn to a method that is classifiable in class 544.
- VI. The method of making according to claim 11, wherein n is 2.  
The claims are drawn to a method that is classifiable in class 540.
- VII. The method of making according to claim 11, wherein n is 3.  
The claims are drawn to a method that is classifiable in class 540.
- VIII. The method of making according to claim 11, wherein n is 4.  
The claims are drawn to a method that is classifiable in class 540.
- IX. The method of treating according to claims 17-18 wherein n is 1.  
The claims are drawn to a method of treatment that is classifiable in class 514.
- X. The method of treating according to claims 17-18 wherein n is 2.  
The claims are drawn to a method of treatment that is classifiable in class 514.
- XI. The method of treating according to claims 17-18 wherein n is 3.

Art Unit: 1623

The claims are drawn to a method of treatment that is classifiable in class 514.

XII. The method of treating according to claims 17-18 wherein n is 4.

The claims are drawn to a method of treatment that is classifiable in class 514.

Inventions of Group I-IV and IX-XII are related as product and process of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with another materially different product, such as those described in U.S. Patent 5,110,927.

Inventions I-IV and V-VIII are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different products.

The inventions of Groups I-XII are separate and patentably distinct because there is no patentable co-action among them and a reference anticipating one member will not render another obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, a search of the twelve groups designated above

Art Unit: 1623

would impose an undue burden upon the examiner, and restriction for examination purposes as indicated is proper.

A telephone call was made to Q. Hong Xu on December 12, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is requested to elect a specifically disclosed species of the invention to be examined for search purposes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL V WARD whose telephone number is 571-272-2909. The examiner can normally be reached on M-F 8 am to 4 pm.
